Forget traditional chemical peels

It's Time to Innovate.

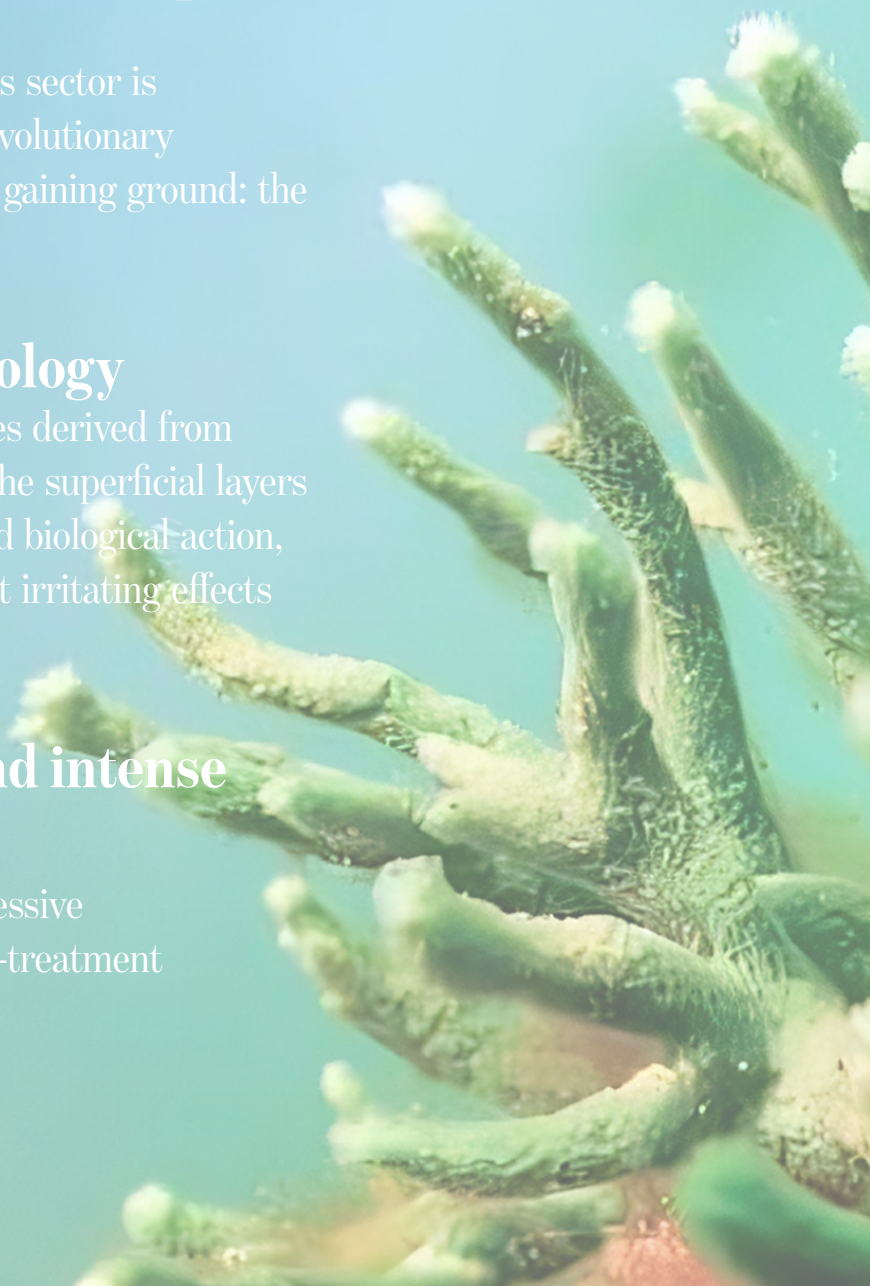

The dermatology and aesthetics sector is constantly evolving. Today, a revolutionary alternative to chemical peels is gaining ground: the Spongilla Spicules method.

An innovative technology

Natural mineral microstructures derived from freshwater sponges penetrate the superficial layers of the skin for a mechanical and biological action, promoting regeneration without irritating effects and prolonged downtime.

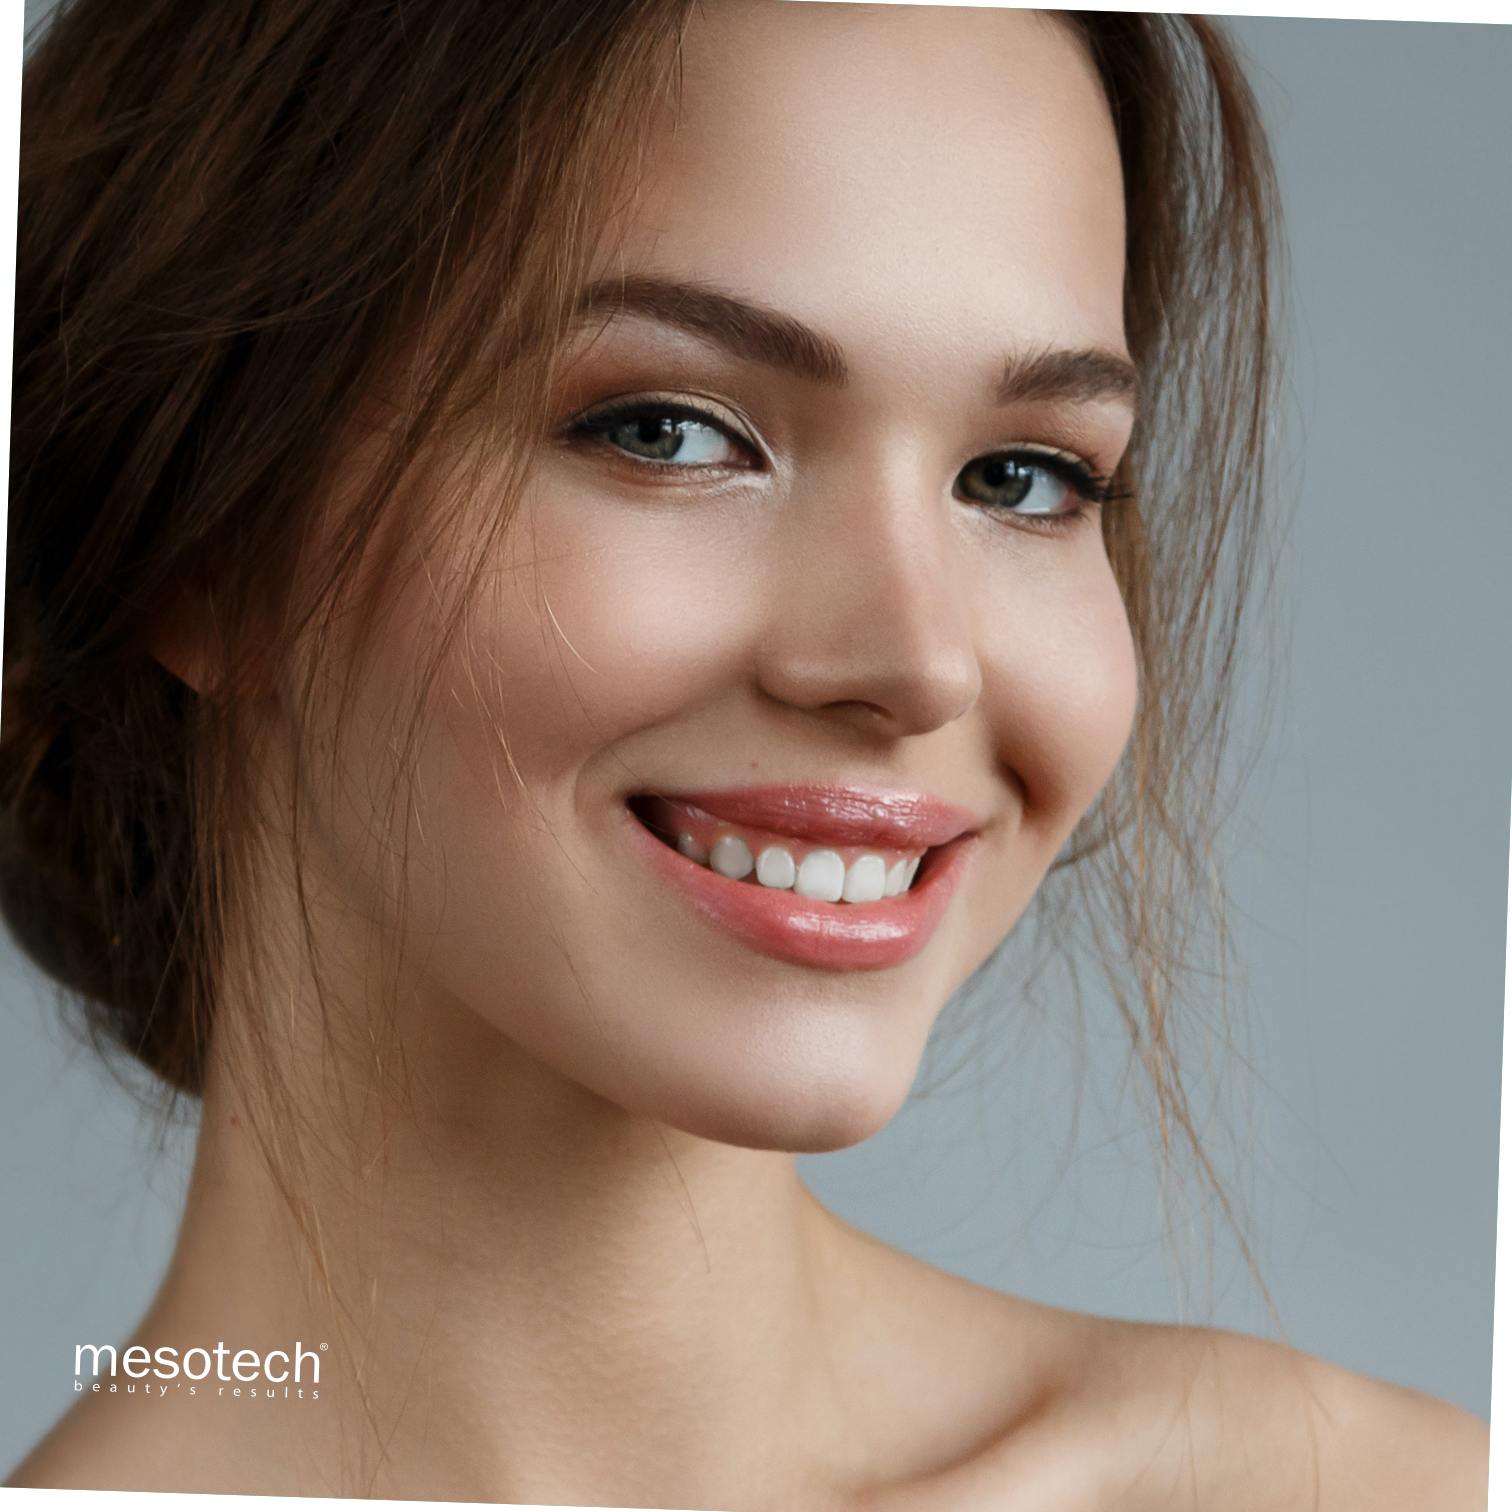

Goodbye to burns and intense peeling!

This system does not use aggressive acids, reducing the risk of post-treatment hyperpigmentation.

Why choose Spongilla Spicules: six key benefits

- 1** ***Deep stimulation without aggression***
It acts in the dermis without altering the skin's pH.
- 2** ***Natural cellular turnover***
The skin regenerates from the inside for 24-48 hours.
- 3** ***No risk of post-inflammatory hyperpigmentation***
Also ideal for sensitive skin.
- 4** ***Long-lasting action***
Traditional chemical peels simply exfoliate the surface layer; Spongilla Spicules stimulates collagen production over time.
- 5** ***Minimal downtime***
Mild redness and flaking for 2-3 days versus the weeks of recovery of a medium-deep peel.
- 6** ***Superior safety***
It does not present any risk of burns, unlike traditional chemical peels or laser treatments.

How does it work?

1 - Spongilla Spicules penetrate the skin, creating micro-channels that stimulate cell renewal.

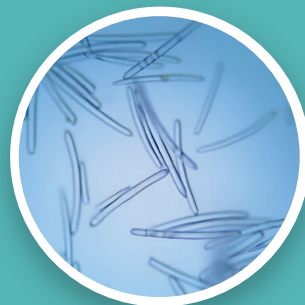

2 - Cells react by activating the neocollagenesis process.

3 - The skin renews itself naturally, with a long-lasting effect without chemical aggression.

Join the professional skincare revolution

If you want to offer your clients an effective, safe and innovative treatment,

Spongilla Spicules is the solution that overcomes the limits of traditional peels.

A kit for every treatment

IDEALSKIN is an innovative, revolutionary and high-performance beauty protocol based on the use of Spongilla Spicules, a 100% natural ingredient *with a purity of 99%*, extracted from freshwater sponges.

ACNE

Idealskin Active

Fights acne, regulates sebum and reduces imperfections, for smoother and more even skin.

LIGHTENING

Idealskin Hyper

Tranexamic Acid and Arbutin for a visible brightening effect.

ANTI-AGE

Idealskin Concept

Botox effect tripeptide to smooth expression lines.

99%
pure

Maximum effectiveness, minimum risk:

Purity makes the difference.

Mesotech uses a 99% pure Spongilla Spicula, a higher quality than that commonly used by other brands.

The high purity drastically reduces the risk of skin reactions or side effects, ensuring a safer, more effective and skin-friendly treatment.
